

- ~~D1~~
- (b) testing each sample for at least one property to generate a property-result for each sample; and
  - (c) comparing the property-result generated for each sample to a baseline or a control for said property to generate a comparison-result for the sample.
- 

~~C2 Sub 33~~ 33. (Amended) The method of claim 30, further comprising generation of a data set from the samples.
